Test-design technique

a	Equivalence Partitioning	1. Enter letters to the phone field in the Delivery contact form. 2. Enter the 9-sign password with Latin letters (including uppercase), digits, special symbol to the password field in the registration form
b	Boundary values	Free delivery for purchases equal to or more than $500. 1. Check the shipping cost when the purchase amount is $499.00 2. Check shipping cost when the purchase amount is $500.00
c	Pairwise testing	1. Test the ordering process with parameters: a) user (log in/not log in), b) purchase amount (free/paid) c) payment method (Visa, Mastercard, Klarna, PayPal) d) delivery zone (USA, Europe, World), e) Delivery Company (1, 2,...5) 2. Test the product listing page with different combinations of sorting and filtering options with parameters: a) sort by price (low to high, high to low), b) sort by popularity (on/off) c) filter by category ("Toys", "Clothing", "Sport", "Furniture", ...) d) sort by size (XS, S, M, L, XL, XXL) e) sale (yes/no)
d	Error Guessing	1. Try to register with email instead password 2. Try sort by price by entering a negative value into the price field
